Age³	Age 15 - 19									3%
	Age 20 - 24									10%

Notes:

- Logistic regression
- Linear regression
- Result for 0-14s based on enumerated person file results, not controlling for Kessler 10 score. Other results based on responding person file regression results, including all control variables above.
- Indicates the number of observations. Where results for 0-14s are reported, the first number represents the number of observations including 0-14s, and the second number represents the number of observations for 15+
- Kessler 10 category of level of psychological distress
- Socio-economic Index for Areas: quintile of relative disadvantage
