	Outer regional	3%	1%	86%	2.64	5.48	57%	6%	4%
	Remote	2%	0%	85%	2.68	5.47	50%	7%	2%

Notes:
1. Logistic regression
2. Linear regression
3. Result for 0-14s based on enumerated person file results, not controlling for Kessler 10 score. Other results based on responding person file regression results, including all control variables above.
4. Indicates the number of observations. Where results for 0-14s are reported, the first number represents the number of observations including 0-14s, and the second number represents the number of observations for 15+
5. Kessler 10 category of level of psychological distress
6. Socio-economic Index for Areas: quintile of relative disadvantage
